Domestic kitchen sink made of Fireclay ceramic

Cleanability: Pass
Load resistance: NPD / NA
(applies to wall hung sinks only)
Durability: Pass
For more information see www.abode.eu/ce.html

Product dimensions and installation information:

note: symbol indicates position of acoustic pad on stainless products.

*Important, fabricator / installer notes:

For undermount sinks:

The cut out size indicated is aligned with outside edge of the bowl top radius (see below).

You should confirm with your client if the worksurface cutout is to be cut flush, inside or outside this suggested perimeter shape & size.

If you create the cutout smaller or larger than the indicated size then the fit of the accessories may be affected and should be physically checked.

General:

All details are provided in good faith and within the tolerances of the manufacturing process.
Note: the dimensions on ceramic fireclay products are subject to wider tolerances due to the nature of this natural material and the firing process.

We recommend that a test cutout is made in scrap timber and checked against the actual sink supplied before committing to cutting the worksurface.

Abode can not accept liability for problems or costs incurred by failure to follow this advice.

CAD cutout files can be downloaded from www.abode.eu
