

EVERPURE CLARIS ULTRA filter cartridges

All information in this Everpure Claris ULTRA guide relates to the use of Everpure Claris ULTRA filter cartridges in combination with Everpure Claris filter heads. The installation & operation guide attached to the Everpure Claris filter heads is also suitable for use with Everpure Claris ULTRA filter cartridges, unless specific information is given for Everpure Claris ULTRA in this guide.

1. Application

The Everpure Claris ULTRA filter cartridges are typically used to feed the following appliances:

- Coffee and espresso machines
- Drinks vending machines
- Ice machines

The Everpure Claris ULTRA filter systems fits into all Everpure Claris filter heads.

2. Function

Everpure Claris ULTRA filter cartridges use a new water-conditioning method to optimize the quality of hot drinks and ice cubes and to protect machine parts from mineral deposits and for water-related aggression. The incorporated 5 µm membrane carbon block reduces undesirable cloudiness, organic impurities, taste and odour and chlorine residue from the filtrate.

3. Flushing during installation and replacement of ULTRA filter cartridges

Replaces 5.1.1,(5) and 5.1.2 (4) in the Everpure Claris installation & operation guide.

Insert the Everpure Claris ULTRA filter cartridge into the filter head by rotation and screw clockwise until it stops (see page 3, item 8). This vents the system and flushes the filter cartridge (type ULTRA 250 and 500 > 10 litres / 3 US gal; 1000 and 1500 > 20 litres / 6 US-gal; 2000 > 30 litres / 8 US-gal).

4. Settings / Capacities

Replaces the table in chapter 10 of the Everpure Claris guide.

The recommended settings and capacities for Everpure Claris ULTRA are mentioned in the tables on page 11. If the actual hardness degree isn't listed in the tables the recommended settings and capacities of the next listed higher hardness degree is valid.

Please note: the hardness degrees listed in the capacity tables relate to carbonate hardness (alkalinity).

5. Technical data

Dimensions		250	500	1000	1500	2000
Height, filter system	[mm]	365	475	410	525	525
Height, filter cartridge	[mm]	315	425	360	475	475
Diameter of filter cartridges	[mm]	95	95	136	136	175
Min. distance from ground	[mm]	40	40	40	40	40
Weight, filter cartridge	[kg]	1.3	1.8	3.2	4.3	6.5
Operating data						
Max. working pressure		2 - 8 bar (29 - 116 psi)				
Water temperature / ambient temperature		4° - 30° C (39° F - 86° F)				

6. Order information

Description	250	500	1000	1500	2000
Filter cartridges	4339-80	4339-81	4339-82	4339-83	4339-84
Single filter head 3/8" thread, in left/out right			4339-21		
Single filter head 3/8" - QCF, in left/out right			4339-23		
Single filter head 1/4" - QCF, in left/out right			4339-25

- de** Die Anwendung KAFFEE-ESPRESSO beschreibt die Zubereitung von Heissgetränken mit Dampferzeugung und VENDING ohne Dampferzeugung. Die angegebenen Kapazitäten sind Richtwerte für den Einzeltassenbezug und können je nach Bezugsvolumen und Maschinentyp variieren. Gerne geben wir spezielle Empfehlung für Ihren Maschinentyp.
- en** The COFFEE-ESPRESSO application describes the production of hot drinks with steam operation and VENDING without steam operation. The stated capacities are intended as guidelines for single cup dispense. The capacities may vary according to dispensed volume and machine type. Please contact us for recommendations.
- nl** De toepassing KOFFIE-ESPRESSO beschrijft de bereiding van warme dranken met stroomproductie en VENDING zonder stroomproductie. De aangegeven capaciteiten zijn richtwaarden voor de bereiding van één kopje. Zij kunnen afhankelijk van het volume van het kopje en het type machine verschillen. Gelieve contact op te nemen als u speciaal voor uw type machine advies wilt hebben.
- fr** L'application CAFÉ-ESPRESSO décrit la préparation de boissons chaudes avec génération de vapeur et VENDING sans génération de vapeur. Les capacités indiquées sont des valeurs indicatives pour une tasse et peuvent varier en fonction de la taille de la tasse et du type de machine. Contactez nous si vous souhaitez des recommandations.
- it** L'applicazione CAFFÈ-ESPRESSO comprende la produzione di bevande calde con produzione di vapore e VENDING senza produzione di vapore. Le capacità indicate vanno intese come guida per un singolo servizio, possono variare a seconda del volume d'acqua e del tipo di macchina. Per ulteriori suggerimenti, contattateci.
- es** La aplicación CAFÉ-EXPRESSO describe la producción de bebidas calientes de vapor y VENDING sin generación de vapor. Las capacidades indicadas sirven como guía para el suministro de la tacita individual. Los valores pueden variar según el volumen suministrado y el tipo de máquina. Acudan a nuestra empresa para cualquier explicación.
- pl** Zastosowanie COFFIE-ESPRESSO opisuje sposób przygotowywania gorących napojów w maszynach wykorzystujących parę oraz w automatach bez pary wodnej. Przedstawione parametry wydajności są przeliczone na pojedynczy kubek napoju. Wydajność może się różnić w zależności od odmierzanej ilości oraz pojemności maszyny. Zapraszamy do kontaktu w celu poznania szczegółów.
- ru** Применение «ЭСПРЕССО» относится к приготовлению горячих напитков с выработкой пара («ТОРГОВЫЕ АВТОМАТЫ» – приготовление без выработки пара). Указанные значения пропускной способности являются ориентировочными, относятся к одной чашке и могут варьироваться в зависимости от объема чашки и типа машины. Мы охотно предоставим Вам специальные рекомендации для Вашей машины.
- pt** A aplicação CAFÉ-EXPRESSO descreve a preparação de bebidas quentes com produção de vapor e VENDING sem produção de vapor. As capacidades indicadas são valores indicativos para chávenas individuais e podem variar conforme os volumes de referência e o tipo de máquina. Teremos todo o prazer em disponibilizar recomendações especiais para o seu tipo de máquina.
