CARE BROCHURE

Our Bristan range of products for care allows you to meet the challenges of specifying for this ever-growing sector while providing safety and comfort, so you have one less thing to worry about.

CONTENTS

6	Essentials
12	Style
18	Practical
26	Ultimate Care
38	Complementary Products
40	Accessories

In this brochure, you'll find a wide choice of products developed specifically for care home and care in the home environments.

Whichever ones you choose, you can be confident they'll be easy to operate for users of all abilities and have the longevity and guarantees required for care providers.

TRUST THE BRISTAN TEAM

We'll be with you every step of the way to help you match the requirements of your project to the right specialist care products.

Our helpful specification support team is always available with advice on legislation and care regulations, as well as technical support for installation and maintenance to maximise performance and safety.

Our technical teams are focused on continued product development to meet the demands of the market and the constantly evolving regulations.

Because just like you, we're dedicated to delivering the best in care washroom environments so that users can be confident.

SPECIFYING FOR CARE WITH CONFIDENCE

Our years of experience mean you can be sure the products you specify meet the fundamental requirements regardless of whether they are for someone living at home or care home residents, satisfying all the latest regulations for user safety.

PREMIUM QUALITY

Care isn't an area to cut corners on quality. So all Bristan products are manufactured from the highest quality materials, to the highest possible quality standard. Our in-house testing product facility has been awarded ISO/IEC 17025: 2005, which is the general requirement for the competence of testing and calibration laboratories, providing additional reassurance and peace of mind.

EASE OF USE

Our entire care range has been attentively designed so the elderly and infirm can operate them easily and safely. Features such as cross head handles are more likely to be recognised by people with dementia. Clear red and blue indices and long lever handles all contribute to a washroom experience that's more comfortable, less stressful and better for overall user's wellbeing.

SAFETY

We are committed to constantly developing our products to the highest standards and many of our taps and showers come with safety features, giving you peace of mind for years to come. As a specifier in the care sector, your decisions can help improve the wellbeing of thousands of people every year, protecting them from scalding and cold water shock whilst providing an environment that guarantees their comfort and safety.

COMFORT AND STYLISH

Just because you require easy to use and safe products doesn't mean you have to compromise on style. Washrooms that are comfortable, modern and easily accessible make a huge difference to the way users think and feel about their new environment.

With taps and showers that are more like fixtures in top end hotels – and controls that are easier for them to use unassisted – user's self-worth, dignity and confidence can be restored.

DOCM ACCESSORIES

Our DocM certified product range gives you a choice of accessories to aid users access to washrooms and encourage independent bathing and toileting where possible. For added flexibility, our most popular ranges are available singly, or as part of our DocM packs.

SPECIFIER SUPPORT

Bristan offers support for specification professionals with project building tools, technical data sheets, BIM data, links to RIBA and much, much more.

**For more information, call our specifier helpline
on 0330 026 6273 or visit www.bristan.com**

UK WIDE DISTRIBUTION

Our market-leading distribution service guarantees next working day delivery to your chosen merchant on orders before 6pm. We'll work alongside you throughout your project to help you make the right choices and ensure you get the products you need, when and where you need them.

GUARANTEE

All Bristan products are quality tested and carry a guarantee against any manufacturing defect. There are also options to extend our standard guarantees and to create bespoke aftercare packages. Speak to our customer service team for more information.

WRAS APPROVED

Bristan products are fully compliant to the UK Water Regulations. Your guarantee you're meeting the standards laid down by all UK regulations and byelaws.

PRODUCT BENEFITS EXPLAINED

At Bristan we're always looking for ways to make things easier for you. That's why we have created icons to highlight the benefits of our products and make them easier to shop.

SAFE TOUCH

Designed to keep the exterior cool to the touch, ensuring you're never at risk of scalding.

PRECISE GLIDE

Features ceramic cartridges for long life durability and more precise control.

EASY FIT INSTALLATION

Designed to make installation quicker and easier.

DECOR SMART

Will use existing holes and fixings to fit in the same spot as your previous shower.

LUMINANCE CHROME

A hardwearing, flawless finish that lasts years. It's also scratch resistant and salt spray tested to ensure added durability.

FAMILY SAFE

Thermostatic temperature control and automatic stops prevent surges of hot or cold water.

RUB CLEAN

There's no need to scrub. Limescale build-up can be easily wiped off the nozzles of this shower product.

TMV2

Thermostatic Mixing Valve regulation, which is acceptable for most premises that aren't medical but still require a level of user safety or duty of care.

TMV3

Thermostatic Mixing Valve regulation which offers the highest level of safety primarily used in Healthcare premises such as Hospitals and Care Homes.

BEAB CARE

This is the highest safety standard by which an electrical product can be tested. The requirements to existing safety standards which take into account the needs of people in care situations.

RNIB

The UK's leading charity, The Royal National Institute of Blind People offers practical and emotional support to those that need it and endorse products that meet their criteria.

Cross Head Basin Taps
VAX 1/2 C

ESSENTIALS

Our essentials product range are designed for ease of use and simple operation. The Lever and Cross Head range features clear indices and separate hot and cold taps as well as thermostatic showering options for user safety.

The Cross Head tap is a traditional design that is at home in all styles of bathroom, from the traditional to the contemporary, its simple looks and durability make it a favourite with specifiers, and older users who prefer the familiarity of the look and feel of taps they grew up with.

HIGHEST SAFETY CARE ELECTRIC SHOWER

Joy Care Thermostatic BEAB Electric Shower

JOYTHCK85 W

The BEAB accredited shower features a maximum temperature setting and auto shut off to prevent scalding. Factory settings can be adjusted at installation to suit requirements.

Seat is for illustration purposes only and is not part of the Bristan product offering.

Ultimate Care Valves

Every year, deaths and serious burns occur from scalding bath water and water from basin taps. Unsurprisingly, it is the elderly and those with mobility problems who are most at risk. It is now best practice to install a TMV (Thermostatic Mixing Valve) in all cases unless a risk assessment has established that it is absolutely safe not to do so.

ULTIMATE IN WATER SAFETY VALVE

15mm Thermostatic Mixing Valve with Isolation

MT503CP-ISO

Automatic water cut off

prevents scalding or cold water shock in the event of hot or cold water supply failure
