Parts List

- A. Tap
- B. Base ring
- C. Base O Ring
- D. Clamp Plate
- E. Standard Nut
- F. Locking Nut
- G. Tap Supply Lines (Red = Hot, Blue = Cold)
- H. Installation tool
- I. NRV x2

Icon Legend

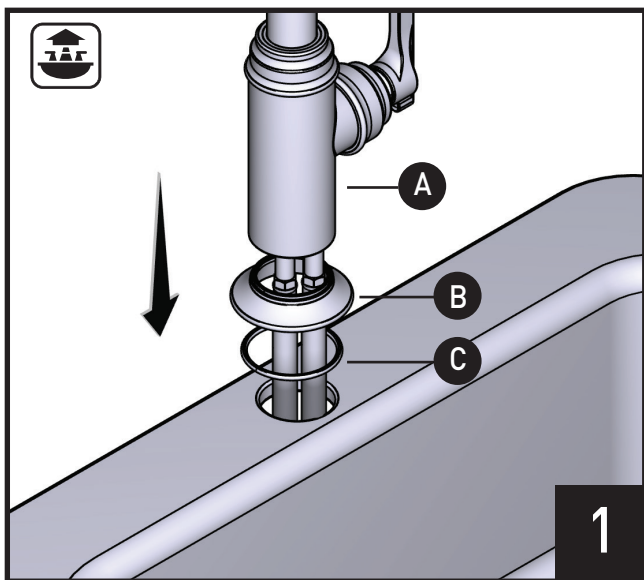

Warning

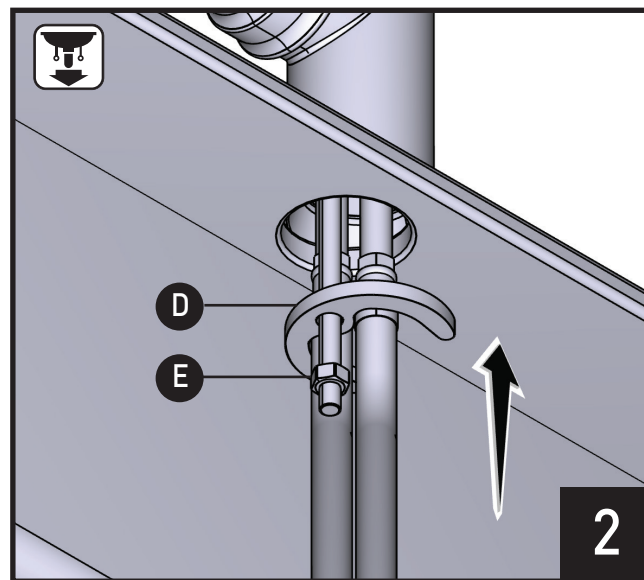

CAUTION — TIPS FOR REMOVAL OF OLD TAP:

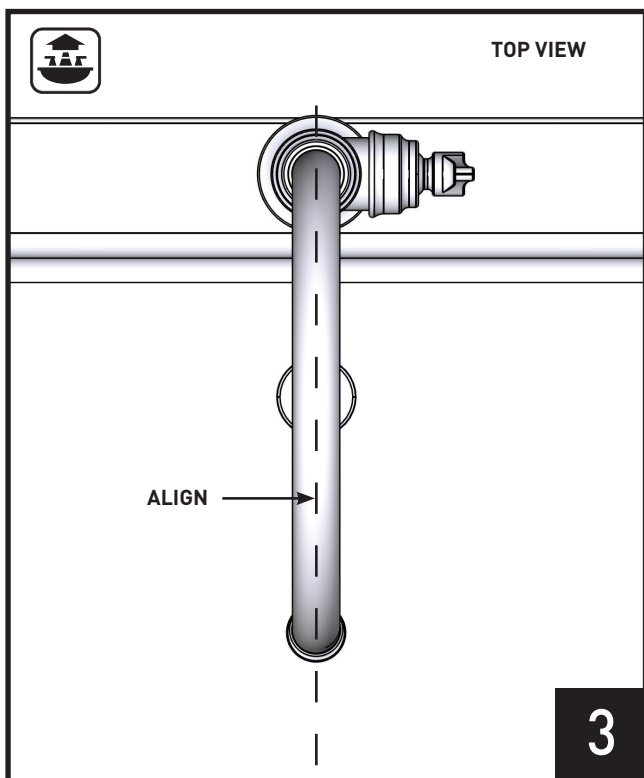

Always turn water supply OFF before removing existing tap or disassembling the valve. Open tap handle to relieve water pressure and ensure that complete water shut-off has been accomplished.

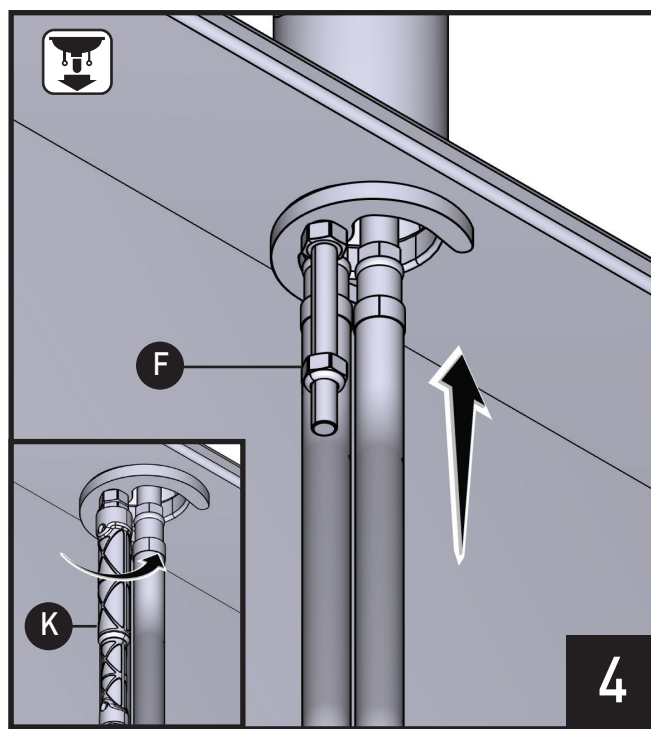

Place the Base Ring (B) and Base O Ring (C) on top of the sink and insert the Tap (A).

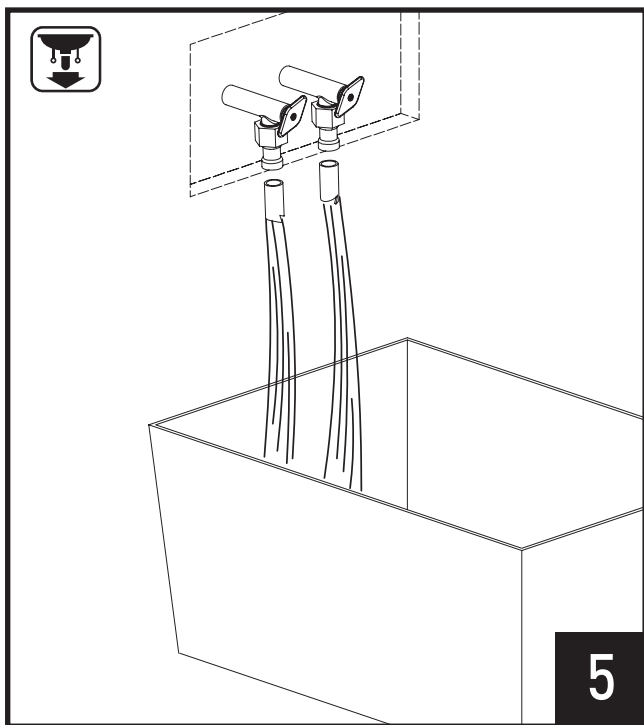

Slide Clamp Plate (D) up onto tap body under sink and secure with Standard Nut (E).

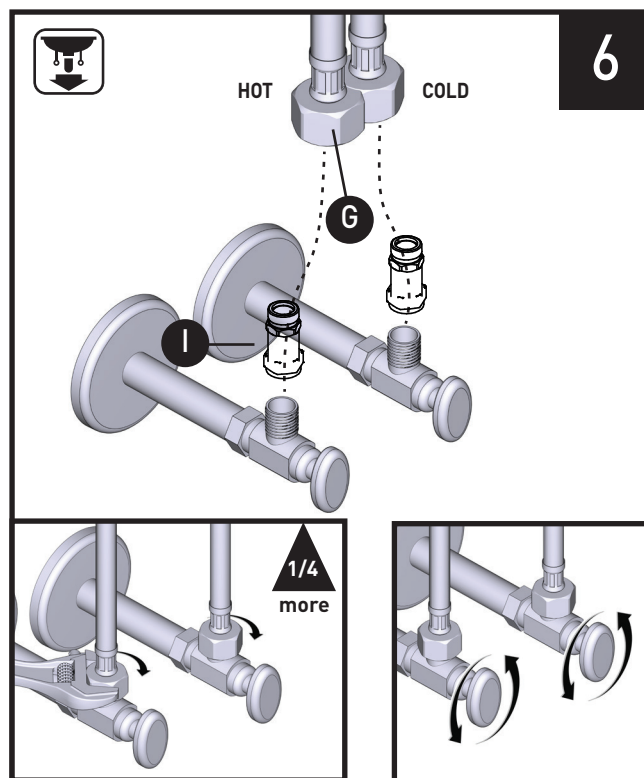

Check overall tap alignment from the top view.

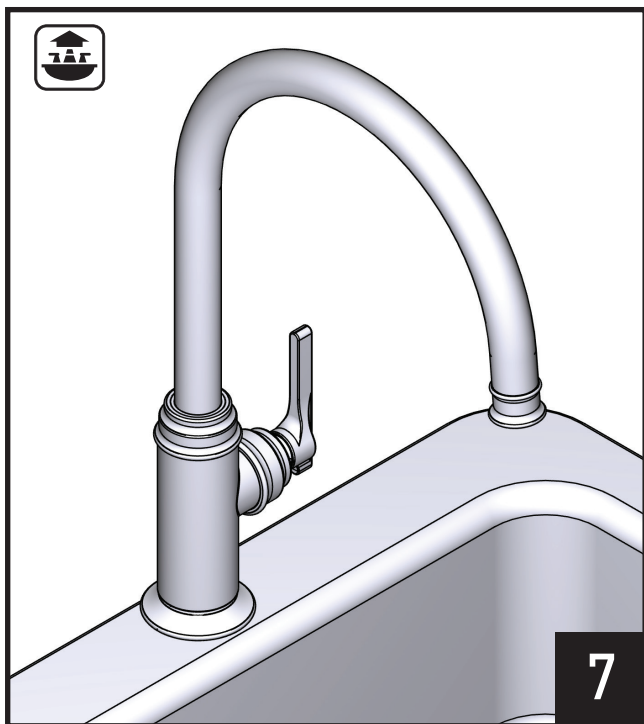

Install the Locking Nut (F) and tighten using the Installation Tool (K).

Run hot and cold water for 5 seconds.

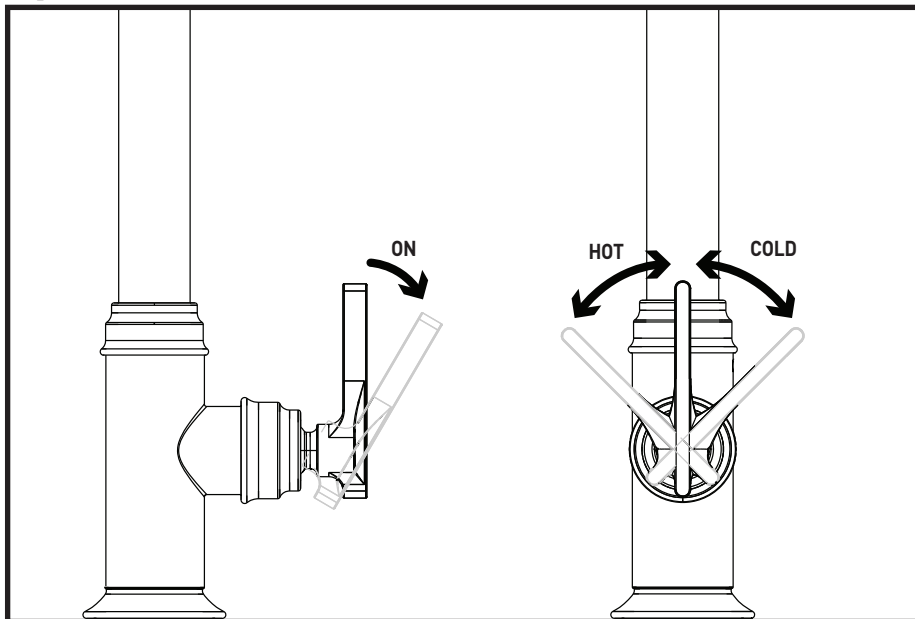

Attach tap supply lines **(G)** to NRV **(I)** onto shut off valves. Tighten by hand, then 1/4 turn more with adjustable wrench. Turn on water and check for leaks.

Installation is complete.

Operation:

Care and maintenance:

Wipe down after use to avoid water spotting and mineral build up. Occasional cleaning with warm soapy water, followed by a polish with a soft cloth is all that is required to keep the plated finish in good condition.

Do not use proprietary abrasive liquids, powders, or pads to clean your Kitchen Tap. Do not use any products with ammonia bleach or limescale remover. You will damage the plated finish and void your guarantee.
